PROFILE

The main profiles of the Pimapen Carisma Window and Door Systems are 70 mm in width. With the 5-cubicle profiles of Class A as per TS EN 12608-1 delivering the best functions in its class, these series offer a higher performance in respect of heat and sound insulation. In addition to a plain casement profile, there is an option for a self-drip design. This is a series with special design central profile that offer a high level of resistance to the wind load in high rise buildings.

GLAZING COMBINATIONS

Deliver a higher level of security with secure glazing combinations that are made available up to 39 mm.

DESIGN

The glazing area gets wider due to the optimized PVC door profile height delivering a spacious space. Thanks to the special design glazing beads with oval lines, the Carisma Window and Door Systems deliver eye-catching and elegant profile-glazing joints. A visual integrity is offered on the interior surface and, the joinery and wall joints with a self-sill frame profile.

EQUIPMENT

In addition to the single opening and double opening window installations, the Carisma Window and Door Systems also offer equipment systems allowing for folding door or sliding door installations that may be used as a door to a balcony or veranda.
